## DLops lab-assignment - 2

---

For **gpu**, **n\_workers** in the hyperparameter can be ignored and rest other parameters are as it is

Hyperparameter1: (Batchsize = 32, epochs = 10, lr = 0.001, n\_workers = 2)

model	gpu-accuracy	gpu-time	gpu-optim-acc	gpu-optim-time
Resnet18	0.9	8min 43s	0.9205	5min 20s
Resnet50	0.901	12min 60s	0.8821	6min 21s

Hyperparameter2: (Batchsize = 16, epochs = 10, lr = 0.001, n\_workers = 4)

model	gpu-accuracy	gpu-time	gpu-optim-acc	gpu-optim-time
Resnet18	0.876	12min 17s	0.9123	4min 25s
Resnet50	0.871	12min 38s	0.88	5min 36s
